PROFESSIONAL EXPERIENCE

Upstox Securities — Fintech & Wealth Management Platform

Product Intern

Mumbai, India

Oct 2025 – Jul 2026

- Built and shipped the **Scanners platform** and increased **watchlist adoption by 70%**.
- Built an internal FD Tracker that sped up fixed-deposit monitoring and improved visibility across FD products.
- Developed **Upstox Wrapped**, delivering personalised user insights that lifted engagement.
- Led the Watchlist tab revamp to raise engagement and reduce drop-off.
- Analysed Equity and F&O usage to shape feature updates, and tracked feature KPIs on Mixpanel dashboards.
- Shipped releases with product, engineering and design teams in an agile setup.

Symbo Insurance — B2B Insurance Platform

Product & Backend Intern

Mumbai, India

Jun 2025 – Oct 2025

- Worked on insurance product and partner integrations within a B2B ecosystem.
- Designed and implemented automation solutions to streamline operational workflows.
- Supported process optimisation initiatives that reduced manual effort and improved execution efficiency.
- Collaborated with product, backend and operations teams across the product lifecycle.

TECHNICAL SKILLS

Programming: Python, R, SQL, JavaScript, HTML, CSS

Cloud & DevOps: AWS (EC2, S3), data pipelines, basic CI/CD workflows, cloud-based deployment fundamentals

Databases: PostgreSQL, Supabase, MySQL

Analytics Tools: Mixpanel, CleverTap, AppsFlyer, Microsoft Excel, PowerPoint, Tableau

Development Tools: VS Code, Google Colab, Jupyter Notebook, Jira, Postman (API testing)

GenAI Tools: n8n, Cursor, Windsurf, Replit, Lovable, Airtable

PROJECTS

Zaya Health Insurance AI Bot

[GitHub](#)

Built a scalable health insurance chatbot using React, FastAPI and n8n for automated, rule-based workflows and backend integrations.

Insurance Data ETL Automation Pipeline

[GitHub](#)

Designed an end-to-end ETL automation pipeline using n8n to ingest, transform and generate insurer-ready reports, reducing processing time from hours to minutes.

Automated Test Case Generator (Jira & Confluence)

[GitHub](#)

Developed a Python automation tool that extracts Jira and Confluence data and uses Generative AI to auto-generate and attach test cases, with Slack notifications.

LEADERSHIP & POSITIONS OF RESPONSIBILITY

- **Secretary**, MUJ ACM Student Chapter | [mu_j_acm](#)

Led initiatives hosting technical events for the club, including the **Student Teacher Student Program (STSP)**, where senior students mentored and guided juniors.

- **Managing Director**, Oneiros'25 (Annual Techno-Cultural Fest) | [Aftermovie](#)

- **Convener**, Elicit'25 (Tech Fest) | [Aftermovie](#)

- **Convener**, GHS Carnival (Hostel Inter-Block Competitions) | [Aftermovie](#)
