

NEET JAIN

Mumbai, India | +91 9892741462 | neetjain1402@gmail.com | [LinkedIn](#) | [GitHub](#)

PERSONAL STATEMENT

MSc Business Analytics and AI student at Warwick Business School with hands-on product experience in fintech and insurtech at Upstox and Symbo Insurance. Combines data-informed product thinking with workflow automation and AI tooling (Python, SQL, n8n) to ship features that improve engagement and efficiency. Seeking product, analytics or AI-focused internship and part-time opportunities in the UK.

EDUCATION

University of Warwick, Warwick Business School Sept 2026 – present
MSc Business Analytics and AI

Manipal University Jaipur, India 2022 – 2026
BTech Information Technology, Minor in Data Science

- CGPA: 9.20/10; Dean's List (top 10%) in semesters I–V and VII

WORK EXPERIENCE

Product Intern, Upstox Securities (fintech and wealth management platform) Oct 2025 – Jul 2026
Mumbai, India

- Led the redesign of the Watchlist tab, improving usability and the overall user experience.
- Developed Upstox Wrapped, a feature delivering personalised user insights to drive engagement.
- Built an internal FD Tracker to improve visibility and management of fixed deposit products.
- Supported Equity and F&O insights work, informing data-driven feature improvements.
- Evaluated feature performance using analytics dashboards and user metrics to guide product decisions.
- Collaborated with product, engineering and design teams in an agile environment.

Product & Backend Intern, Symbo Insurance (B2B insurance platform) Jun 2025 – Oct 2025
Mumbai, India

- Worked on insurance product features and partner integrations within a B2B ecosystem.
- Designed and implemented automation solutions to streamline operational workflows.
- Supported process optimisation initiatives that reduced manual effort and improved efficiency.
- Collaborated with product, backend and operations teams across the product lifecycle.

PROJECTS

Zaya Health Insurance AI Bot | React, FastAPI, n8n | [GitHub](#)

- Built a scalable health insurance chatbot with rule-based workflows and backend integrations.

Insurance Data ETL Automation Pipeline | n8n | [GitHub](#)

- Designed an end-to-end pipeline to ingest, transform and generate insurer-ready reports, reducing processing time from hours to minutes.

Automated Test Case Generator (Jira and Confluence) | Python, Generative AI | [GitHub](#)

- Developed a Python tool that extracts Jira and Confluence data and uses Generative AI to generate and attach test cases, with Slack notifications.

SKILLS

Programming and databases: Python, SQL, JavaScript, HTML, CSS; PostgreSQL, Supabase, MySQL

Analytics and BI: Mixpanel, CleverTap, AppsFlyer, Tableau, Microsoft Excel

Automation and GenAI tools: n8n, Cursor, Windsurf, Replit, Lovable, Airtable
